

Dipl.-Ing. Dr. Barbara Streimelweger, MBA, CMC

After more than 11-years in the industry and the private sector Barbara Streimelweger worked as self-employed Management Consultant and founded **Stragere Management Consulting e.U.** in 2008.

Since May 2016 she also provides services as Consulting Engineers in the fields of Electrical Engineering and Telecommunications Engineering as part of her founded company **Stragere Engineering Solutions e.U.**

For customers and partners there are no changes – except a wider range of services can be offered.

From an entrepreneurial and organizational perspective, the separation into two companies in turn allows a clear assignment to the two divisions.

Consulting, Coaching and **Seminars & Trainings** are the three core areas that Stragere offers as total package.

Stragere Management Consulting e.U.

Stragere Engineering Solutions e.U.
